### Reason for change

- The sub-fund can currently invest up to 10% of its assets in aggregate in distressed debt and catastrophe bonds.
- The Investment Manager believes that disaggregating the limit to these asset classes would be beneficial to investors because they exhibit different risk and return profiles and it would be prudent to manage each asset class separately.
- Moreover, the Investment Manager believes that increasing its allocation to both asset classes would be in the best interests of investors as they present a growing opportunity for better risk-adjusted returns.
- There will be no material increase to the risk profile of the sub-fund.
